## **ASSIGNMENT 1 REDUX**

Each group should prepare two sentence answers to be read out to the class. Then we shall have a short discussion period:

1. As a business proposition was Henry's Turkey Service a profitable enterprise? (Briefly explain.)
2. Did Texas and other taxpayers pay more or less compared to the alternative of institutionalizing the men of Atalissa over this period?
3. Did the men who signed on with Henry's Turkey service have a better or worse life compared to what Texas had offered them? (Give an informed guess by comparing with comparable state run institutions like Veterans' hospitals or prisons for example, or the street/relatives.)
4. Are personnel managers paid more for working in businesses like this one than:
  - (i) in institutions for people with mental disabilities?
  - (ii) managing employees on turkey farms where none of the workers have mental disabilities?
