

# Downloading Comlabgames

- The Comlabgames software requires a [JAVA](#) installation. If you need to install it, go to [JAVA](#).
- To save the Comlabgames module on your desktop:
  1. Open a browser, and go to the [Comlabgames](#) website.
  2. Save the “Standalone version” on your desktop for use during CEMMAP master class. (Please keep the app for future use.)
  3. The Comlabgames app on your desktop should look:

# Checking the Comlabgames Software

1. Double Click on ComLabGames app  to start the software.
2. Allow access when prompted on "Windows security alert display".
3. The Design window is displayed by default.
4. If you see the design display you are ready to:
  - play games as an experimental subject.
  - design games to conduct your own experiments.
  - analyze the resulting experimental outcomes.
